LA CASA DEI LIMONI, CONSERVATORIES COLLECTION

Style and elegance; the winter gardens were created to renew and preserve harmony with nature and places – a value from the past that we restore to the present with this collection. Authentic and very comfortable outdoor rooms where design and technology, chromatic games, styles, decorations, shadows and lights merge to create environments of rare beauty.

La Casa dei Limoni is a refined offering of conservatories created and designed by the Gaudenzi Ferretti Partners studio, which recall the magnificent works in steel and glass of the late 1800s and contain design references of the great Renaissance masters. “Brunelleschi” harmony and transparency with essential elegance; “Bramante” classic proportions and majestic shapes; “Bernini” lightness and drive towards heaven, which reaches complex oriental geometries in its development.

“Palladio” is the most essential offering – a sophisticated pergola that blends classic elegance and modern details.

Each model is a dynamic space that integrates with the surrounding one and welcomes and illuminates that fascinating area of perfection between heaven and earth with style.
