The synthetic rattan that we use is a fiber made of HDPE High Density Polyethylene with the following features:

- UV and weather resistant
- Environmental friendly
- Washable and durable
- 100% recyclable
- Non-fading
- Easy maintenance
- High tensile strength
- Non-toxic

Standard maintenance:

To clean, use a soft cloth / brush with water and, if necessary, a neutral detergent.

Do not use solvents or alkaline detergents which could damage the strings. Avoid chemical detergents, aggressive solvents, rigid brushes and high pressure water, this in order not to deteriorate the surface of the rope itself.

Never scrape the surface.

Remove the dirt on the surface by washing with water, use non-aggressive detergent products with the help of sponges and / or soft rags.

Rinse thoroughly until all detergent or soap residues are completely eliminated. If the dirt persists, repeat the operation.

Cleaning tips:

- Spray Cleaner (Chanteclair or similar) on the surface and let cleaning solution sit 1 minute.
- Brush the surface repeatedly in a circular motion using a soft bristle brush.
- Flush with plenty of water, as it is very important to avoid residue drying on surface. Wipe with a dry cloth.
